Pip's Midnight Nursery

"I build the dreams you fall asleep inside."

Manthan · Solo · Track 1 · haX.baby 2026

A 90s GeoCities-style dream-desk portfolio where every single project is a playable toy, not a static card.

The dare: same baby, 1,000 websites

Track 1 challenge

The Track 1 premise

One shared character prompt

Every builder in Track 1 starts with the exact same character specification: **Pip**.

When a thousand submissions share the same baby, a static template of text and cards blends right into the crowd.

Our answer

The contest is execution

Pip's Midnight Nursery transforms the browser into a tactile, interactive 90s dream workshop.

Every invention synthesizes live audio, animates in real time, or reacts when you poke it.

The mission: Don't just tell visitors Pip is a Junior Dream Engineer — let them play with Pip's tools.

Meet Pip

Official nursery badge

Pip · Age: 1,000 moons

"I build the dreams you fall asleep inside."

💀 Character: cute skull-faced baby

Warm cream skull face, glowing golden eyes, and a starry nightcap — adorable, cozy, and never scary.

🛠️ Job: Junior Dream Engineer at the Midnight Nursery

Designs custom dreams, soothing lullabies, and glowing nightlights for little night creatures.

🌙 Personality: sleepy, giggly, clumsy

Follows your mouse around the nursery, giggles whenever poked, and dozes off when tucked in.

Design philosophy

Core architecture rule

"Every project must be a toy, not a card."

A portfolio shouldn't just list skills — every single panel is an interactive gadget you can play with immediately.

🎨 90s dream-desk palette

Cream `#fff8f1` background, berry `#a34063` accents, cocoa `#5c4033` text, and gold `#f5c542` highlights.

💻 Tactile GeoCities charm

Chunky outset 3D bevel borders, ambient starfield touches, live visitor counter, and 88×31 retro web badges.

🧸 Zero dead placeholders

No "coming soon" links or lorem ipsum. Every control makes music, animates SVG routes, or saves scores.

The 6 playable projects

All interactive in-browser

1. Lullaby Lab

SYNTH

Real Web Audio synth that plays a different procedural melody nightly.

2. Nightlight Collection

THEME

Interactive glowing nightlights with nursery day and night mode switching.

3. Dream Delivery Routes

SVG MAP

Animated SVG map tracking Pip's nightly dream deliveries across rooftops.

4. Growth Chart

SKILLS

Tap-for-facts skill chart measuring milestones in centimeters of giggles.

5. Block Tower

ARCADE

Playable stacking game with keyboard controls and high-score tracking.

6. Bedtime Storybook

5 PAGES

Illustrated 5-page flipbook with smooth page turns and keyboard navigation.

Signature moments & easter eggs

Try it live hints

🔦 Dream Vault flashlight cursor

Try it live: sweep your flashlight cursor across the dark vault to uncover the hidden golden dream easter egg.

🔦 Toggle flashlight preview

🛏️ "Tuck Pip in" goodnight sequence

Try it live: dims the entire nursery into a starry sleep screen with a gentle lullaby until you wake Pip up.

🛏️ Tuck Pip in right now

💬 Ask Pip chat & live guestbook

Try it live: rule-based chat that remembers your name, plus a real-time Firebase guestbook wall for visitors.

🎮 Konami code & 88×31 badges

Try it live: enter `↑↑↓↓←→←→BA` for a secret surprise, and inspect the 88×31 retro footer badges.

Under the hood

Lean & dependency-free

⚡ Vanilla HTML, CSS & JavaScript

Zero heavy UI frameworks or external dependencies. Clean, hand-written code built from scratch in 48 hours.

🎹 Web Audio API (zero audio files)

Every lullaby melody, chime, and sound effect is synthesized mathematically in real time inside the browser.

🔥 Firebase Realtime Database

Powers the live nursery guestbook and real-time visitor counter with strict server-side validation rules.

Performance metrics

114 KB

Total page weight (instant load)

✅ **Zero console errors**

📱 **Mobile-tested** across touch screens

Verification & proof of quality

Production-hardened

Security audit

2 penetration audits passed

Audited end-to-end for XSS, script injection, and DOM tampering across Ask Pip chat and guestbook inputs.

✅ 2 / 2 AUDITS PASSED

Database defense

Firebase survived live attack tests

Tested against unauthorized writes, oversized payload floods, and schema spoofing — all blocked cleanly.

🛡️ LIVE ATTACKS DENIED

Full QA matrix

10/10 + 7/7 QA passes

Every toy, keyboard control, audio synth node, mobile breakpoint, and easter egg verified without errors.

🏆 10/10 & 7/7 QA PASS
